

32" SELF-SERVICE CHECKOUT KIOSK

The better manage for your business activity

Touch Kiosk, 10 touch points, LAN and WI-FI connection, Barcode and QR Code reader.

The bright and attractive 32" Display allows users to independently manage the orders from the self-service checkout kiosk touch screen, avoiding queues and crowds of people and ensuring social distance.

By scanning with your smartphone the QR Code displayed on the self-service checkout kiosk, the order management and payment will be transferred directly to your smartphone.

Simplified menu management with images and videos that can be managed locally or remotely.

The device can be provided for application on wall or with stand.

- Wall mounted (standard version)
- Stand installation (optional version)

Self-service payment Kiosk for use in restaurants, pizzerias, retail stores, shopping centers, hotels, ticket offices.

SMARTSELFERVICE

SmartSelfservice is the software for menu and orders management with credit/debit card payment directly from the bank POS or cash payment through a receipt at the manual cashier.

Management of loyalty cards, scanned by the self-service checkout kiosk, to activate promotions/discounts and retain customers.

SmartSelfservice is provided for free and is fully functional already on the self-service checkout kiosk Android version.

Multilingual menu.

SMARTSELFSERVICE FOR ORDERS AND PAYMENTS MANAGEMENT FOR CATERING, HOSPITALITY, ENTERTAINMENT AND ANY KIND OF AUTOMATED TICKETING.

USER INTERFACE: THE FRONT-END SOFTWARE FOR THE END USER

From the touch display of the self-service checkout kiosk or sitting at the interactive table, the end user selects the type of suggested menu, customizing dishes with ingredients from the Chef, according to their taste or nutritional needs.

PAYMENT METHOD FOR THE END USER

1. ORDER FROM SELF-SERVICE CHECKOUT KIOSK:

The customer can pay directly at the kiosk POS with credit/debit cards, or can obtain a pre-order receipt and pay at the traditional cashier, sending the order to the kitchen.

2. ORDER FROM SELF-SERVICE CHECKOUT KIOSK TRANSFERRED TO SMARTPHONE:

payment through online systems preconfigured and activated by the store (Paypal, Google Pay, etc.) or cash payment at the traditional cashier showing the ID of the order.

After scanning the QR code proposed by self-service checkout kiosk with your smartphone, the order is transferred to your device, leaving the possibility to others to use the self-service checkout.

SMARTSELFERVICE FOR ORDERS AND PAYMENTS MANAGEMENT FOR CATERING, HOSPITALITY, ENTERTAINMENT AND ANY KIND OF AUTOMATED TICKETING.

INTERFACE MANAGEMENT: THE BACK-END FOR THE BUSINESS OWNER

Configure the menus to be proposed, the individual products, by placing all the ingredients that customers can choose when ordering.

Add images and videos of the products and preparations that will help the customer in the selection phase, to improve your business.

Publish content, images and videos on the self-service checkout kiosk and on interactive tables for better communication, giving a personalized shopping experience to the end user.

The screenshot displays the SmartMedia administrative dashboard. On the left, a sidebar menu includes 'Orders', 'Kitchen', 'Products', and 'Settings'. The main area is split into two panels. The left panel, titled 'Orders', shows a summary with '18 orders to be paid' and a total of '\$ 108.91'. Below this is a table of 'Advanced tables' with columns for 'ORDER ID', 'DEVICE', 'TOT. \$', and 'PAYMENT'. The right panel, titled 'Add or remove products from the menu', contains a form with fields for 'Category' (set to 'Burgers'), 'Product name' (set to 'Veggie'), and 'Sale price' (set to '4.99'). It also includes a 'Select image from the gallery' dropdown and a 'Select file' button.

ORDER ID	DEVICE	TOT. \$	PAYMENT
204	1	4.99	postponed
311	2	10.08	in advance
312	2	19	postponed
313	2	8.40	in advance
314	1	19	postponed
315	1	12	in advance
